Att 4

RECENT CUBAN DEVELOPMENTS

1. New SA-2 sites located 2.5 n.m. SSE of Santiago de Cuba, Cabanas and Deleite bring the present total to 22. The Santa Lucia location has been abandoned. A second SAM assembly area 3.1 n.m. NW of Santiago de Cuba has also been noted.

4. [redacted] of OSI examined the photography which according to NPIC concerned a modified three dish FRUIT SET. Neither [redacted] nor the NPIC analyst working with him could see a second FRUIT SET, let alone one with three dishes. Unfortunately the memorandum sent the DD/R yesterday, although based on factual reporting by NPIC, is apparently in error. OSI has not yet had the opportunity to discuss the report with the responsible NPIC analyst. The large unidentified object also mentioned in the report now appears to be two trailers jointly covered by a tarp. Further examination is in progress.
